

Name: \_\_\_\_\_

# cell organelles

## Across

**2.** makes proteins,  
some float or attached

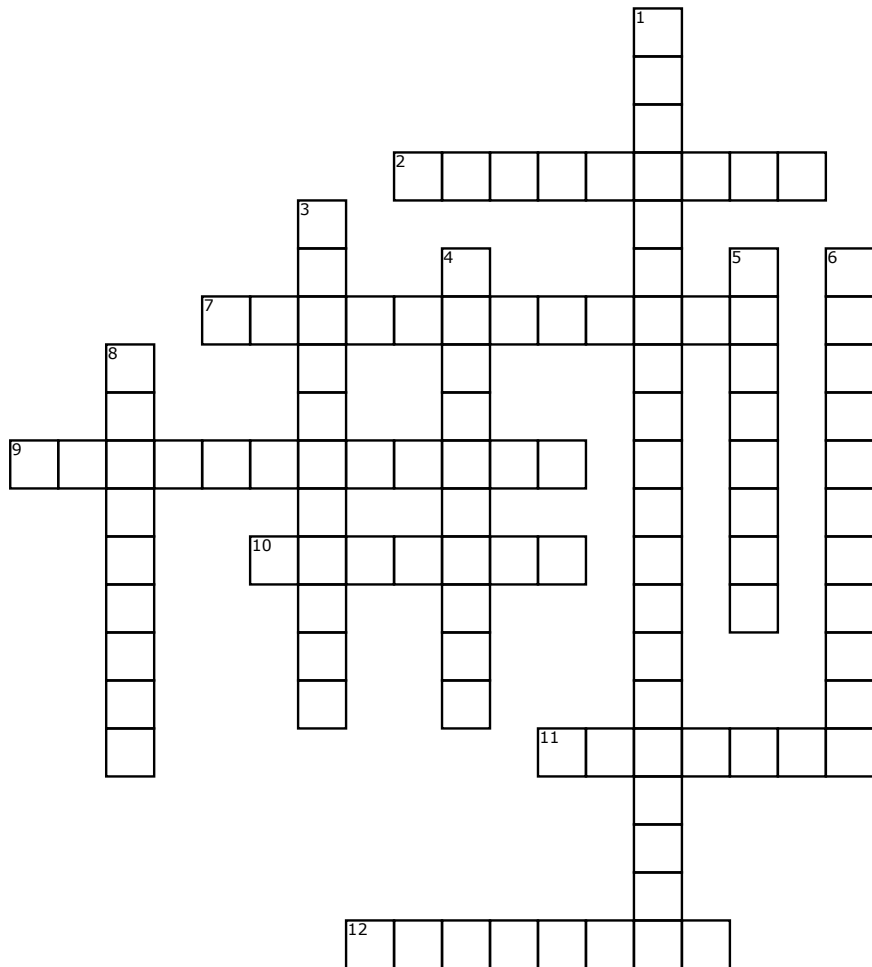

**7.** surrounds the  
cell, controls materials  
entering and leaving  
the cell

**9.** "powerhouses" of  
the cell

**10.** storage sacs,  
may contain food,  
waste, water

**11.** controls the cell,  
stores genetic  
information

**12.** breaks down and  
recycles wastes

## Down

**1.** assembles the  
lipids for the cell  
membrane

**3.** green, capture  
light to produce food  
for plants

**4.** organize cell  
division

**5.** shapes and  
supports the plant cell

**6.** packages and  
transports proteins  
and other materials

**8.** help cell parts  
move
