

Name: _____

Date: _____

cell organelles

Across

- 3.** creates protein
- 4.** provides internal support
- 6.** tail
- 7.** site of ribosome synthesis
- 14.** creates glucose
- 15.** information center of the cell
- 17.** for cellular division and cellular reproduction
- 18.** transport storage

Down

- 1.** supports structure and helps move synthesized proteins
- 2.** where all chemicals take place
- 5.** synthesis, packages and releases concentrate proteins or lipids
- 8.** threadlike mass of DNA
- 9.** separates cell contents from the environment

- 10.** produces energy through cellular respiration
- 11.** small membrane bounded transport vesicles
- 12.** contains food or water
- 13.** protein or lipid enters the cytoplasm
- 16.** creates lipids or fats
