

Name: _____

Date: _____

cell tissue

Across

10. smooth muscle cells, acting filaments organize in bundles

12. thick liquid that is inside an organism

13. cells specialized in storing energy as fat

14. structurally related proteins that form vertebrate gap junctions

15. involved in mitosis, intracellular, transport and maintenance of cell shape

16. a protein that forms microfilaments

17. the action or state of being added to a group or structure

18. specialized intercellular connection between a multitude of animal cell types

Down

1. red blood cell

2. common cells of connective tissue in animals

3. stabilizes organelles

4. anything with fiber in it

5. any animal tissue that covers a surface

6. large white blood cell

7. cellular membrane protrusions that increase the surface area for diffusion

8. two cells attached, formed from protein plaques in the cell membrane

9. narrow spindle-shaped cell with a single located nucleus

11. immature egg cell
