

Name: _____

Date: _____

cells

Across

3. The basic unit of all living things
6. powerhouse of the cell
8. when molecules move from high to low concentration
9. process where the cell membrane removes materials too large to pass through
10. the movement of substances across the cell membrane without energy

Word Bank

cell membrane diffusion
active transport tissue
passive transport mitochondria

Down

1. surrounds the cell- plant and animal
2. when food is broken down to release chemical energy
4. cell with no nucleus
5. the movement of substances across a cell membrane using energy
7. when a group of cells work together to perform a task

cellular respiration prokaryotic
exocytosis cells
