

cellular respiration

Across

3. where does the 2nd and 3rd process happen?

6. What's the 3rd part of cellular respiration

8. What is glycolysis broken down into?

9. what does the process begin with?

11. how many ATP are produced in the end of the cycle?

12. what is the second process of the cycle?

Down

1. What is another anaerobic process?

2. how many atp is produced from a single molecule of glucose through glycolysis

4. where does glycolysis take place?

5. doesn't need oxygen

7. requires oxygen

10. what causes muscle soreness?
