

Name: _____

Date: _____

clotting cascade and coagulants

Across

2. Vitamin K is stored in the....

5. which pathway is activated by the damaged of the blood vessel and exposure of collagen

8. what is the factor called that activate factor x to factor Xa

10. factor II is called ?

11. how many pathways in the clotting cascade

13. what prevents clotting of blood in vessels

14. what is the antidote for HEPARIN

15. what is the sequence of response that stops bleeding?

Down

1. factor iii is also calledfactor?

3. the antidote for Wafarin is.Vitamin K and.....

4. which pathway occurs rapidly

6. the vitamin essential for blood clotting

7. what plasma protein converts fibrinogen into fibrin

9. the plasma protein involve in coagulation of blood

12. factor IV is also called...?

Word Bank

haemostasis

prothrombin

thrombin

vitamin k

PROTAMINE

TENASE

intrinsic

tissue

heparin

fresh frozen plasma

liver

three

calcium

extrinsic pathway

fibrinogen
