disorders

Across

- 4.** is a defense mechanism leading to the temporary or long-term reversion of the ego to an earlier stage of development rather than handling unacceptable impulses in a more adaptive way
- 6.** an extreme or irrational fear of or aversion to something
- 7.** an idiosyncratic belief or impression that is firmly maintained despite being contradicted by what is generally accepted as reality or rational argument, typically a symptom of mental disorder
- 10.** an addiction to the consumption of alcoholic liquor or the mental illness and compulsive behavior resulting from alcohol dependency

Down

- 1.** a long-term mental disorder of a type involving a breakdown in the relation between thought, emotion, and behavior, leading to faulty perception, inappropriate actions and feelings, withdrawal from reality and personal relationships into fantasy and delusion, and a sense of mental fragmentation
- 2.** a condition of persistent mental and emotional stress occurring as a result of injury or severe psychological shock
- 3.** the action or process of suppressing a thought or desire in oneself so that it remains unconscious
- 5.** mental illness marked by periods of great excitement or euphoria, delusions, and overactivity
- 8.** a personality disorder characterized by excessive orderliness, perfectionism, attention to details, and a need for control in relating to others
- 9.** rare condition in which two or more distinct identities, or personality states, are present in—and alternately take control of—an individual
