

evolution project

Across

1. selection by humans of animals and plants with characteristics for use in breeding over generations.
9. different ancestor, similar function, different structure
10. Passing from one part to another, said of certain
11. The change in the frequency of genes

12. the process by which certain traits make it more possible for an organism to survive

Down

2. Evidence of evolution
3. A change in or the process of changing
4. when a population becomes better suited to its habitat

5. ability of an organism to survive and reproduce in its environment.
6. the action or art of imitating someone or something, typically in order to entertain or ridicule:
7. a method of blending into an environment
8. The process by which something changes into a different form.
