

Name: _____

forces

Across

- 2. states an object acceleration is the same direction
- 4. whats is change in a object
- 7. sum of all forces acting on an object
- 8. whats a push or pull

10. whats the opposite of 2nd newtons law

12. force that opposes the sliding motion

Down

1. object moving at a constant velocity

3. whats a region of space

5. what is universal law of gravitation

6. attractive force between two objects

9. what keep a constant speed

11. newton first law sometimes called

Word Bank

weight

net force

friction

newtons second law of motion

field

newtons third law

inertia

Newton's first law of motion

gravity

force

velocity

motion
