

# geography homework

## Across

**3.** the water that rolls back down a beach after a wave has broken

**9.** water trapping air in cracks and caves and the force of the water itself against the cliffs.

**12.** the process whereby beach material is gradually shifted along a beach by waves meeting the shore at an oblique angle.

**13.** low coastal grassland that is frequently overflowed by the tide

## Down

**1.** is where the land meets the sea

**2.** an embankment to prevent erosion of a shoreline.

**4.** pebbles hitting each other in the waves

**5.** -a wall built into the sea from the seashore to create a beach by trapping sand carried by longshore drift

**6.** waves throwing pebbles at cliff

**7.** an area of sand or pebbles along a coast

**8.** a long narrow accumulation of sand and shingle that grows out from the coastline

**10.** a steep rocky slope that may overlook the sea

**11.** a part of the coastline that juts out into the sea and usually ends in a cliff.
