

Name: _____

Date: _____

geometry

Across

- 5.** a closed plane curve
9. An angle that measures 90°
11. having two parallel and two nonparallel sides
13. a polygon having six sides and six angles
14. Distance around a circle (the perimeter)
15. A line segment joining two points on a curve.

- 16.** Point at which two line segments intersect

- 18.** two dimensional surface

- 19.** A triangle with two equal length sides

Down

- 1.** A triangle with all three sides of equal length
2. space between intersecting lines
3. Part of a curve
4. An angle that measures less than 90°

- 6.** A location in space - a dot on a piece of paper
7. A triangle with all three sides with different lengths

- 8.** A line segment joining and passes through the circle's center

- 10.** the outline of a figure

- 12.** An angle that measures more than 90°

- 17.** Distance from center of a circle to any point
