

geometry project

Across

2. turning an object into another position
4. making the image flip across the axis
6. moving an object
7. a shape
8. whole numbers greater than one

9. When two or more transformations are combined to form a new transformation

10. transforming an object in some way or another

Down

1. It is a line that is reflected over in a reflection.
3. a transformation that preserves the degrees of the angles.
5. the object before reflection
