# linear equations

Across

2. If a=0 and b≠0, the equation is

5. The solution of the linear equations is

7. An identity is an equation which is always

10. A linear equation is a polynomial of degree

11. The positive integers together with 0

12. an equation with 4 or more terms

13. If a=0 and b=0, the equation is

Down

1. This is an example of what property: 2(x+5) = 2x + 10

3. To solve an equation means finding the value of

4. If a≠0 the equation is

6. index or power

8. Standard form of a linear equation is

9. A quadratic equation is a polynomial of degree
