

Name: _____

Date: _____

lymphatic system

Across

1. response triggered by damage.

3. antibody- mediated immunity

5. swellings in the lymphatic system, and lymphocytes are formed.

11. white blood cells searching for pathogens to engulf.

13. targets infected cells.

14. non-specific, surface barriers.

15. body fluids

16. artificially acquired, destroys growth of bacteria

18. may be produced by one or more types of cells.

19. lymphatic tissues around pharynx, captures bad stuff.

20. specific, has to be primed.

Down

2. have mini valves that prevent the lymph from leaking

4. empties lymph into venous contraction.

6. a primary lymphoid structure, t-cells mature

7. produce antibodies to go against antigens.

8. system response, regulated by the hypothalamus

9. immune surveillance and turns lymphocyte into another cell.

10. the body sees this as foreign.

12. artificially acquired.

17. binds antigens to receptors, speeding up response time
