

# mod 6

## Across

4. what is also known as bamboo spine
5. The \_\_\_\_ is the most radiosensitive
6. breath in
19. touches the body of a vertebra
20. Occupational dose
23. On an LPO cervical spine what side is affected
25. what is another name for the dens
26. at the level of t9-t10
27. patient dose
28. What is demonstrated in the AP open mouth projection
30. c2
34. On an LAO cervical spine what side is affected
35. at the level of c7-t1
36. What position do you see they zygapophyseal joint

37. How many bones are in the adult vertebral column

38. panting like a dog
39. Are the building blocks of proteins

## Down

1. Redness of the skin
2. the lowest margin of the ribs
3. What is the most distal portion of the vertebral column
7. Function is storing energy
8. once called by the older term apophyseal joints
9. at the level of t2-t3
10. bamboo spine
11. What position do you see the inter vertebral foramina
12. breath out
13. the distal pointed tip of the coccyx is termed

14. Extends laterally from the junction of each pedicle and lamina

15. loss of bone mass

16. this is sometimes called lateral mass

17. at the level of c4-c5

18. extends posteriorly at the midline junction of the two laminae

21. abnormal or exaggerated lateral curvature of the spine

22. abnormal condition characterized by increased convexity of the thoracic spine

24. C1

29. Important group of proteins that are found in all living cells

31. Combination of two or more tissues that are combined to perform specific function

32. what is inferior to the lumbar vertebrae

33. The intensity in the air
