

2.6

Across

3. Synthesizes RNA from DNA

10. Enzyme that synthesizes DNA

11. Bond with adenine

12. Binds with Cytosine

13. Carrier of genetic information

14. GC, AT

Down

1. Monomer of nucleic acids

2. Weak bond resulting from electrostatic imbalance

4. DNA/Rna, nucleotides linked together

5. Binds with guanine

6. Many monomers linked together

7. Carries instructions for synthesis of proteins

8. RNA, adenine

9. One of 4 bases of RNA and DNA
