

research

Across

1. participants are unaware they are being observed
3. experiment where the IV isn't manipulated but has changed anyway
4. variable, other than IV, that impacts results
6. lowest score subtracted from highest score
7. experiment which occurs in a natural setting, IV deliberately manipulated
10. variable that is measured
12. data expressed numerically

15. type of question that creates qualitative data

16. score that occurs most frequently
17. a set of written questions to assess an individuals thoughts/experiences
20. experimental design in which participants experience all conditions
22. methods that narrow downs target population for research

Down

2. data expressed in words
5. privacy and _____

8. middle score of data when put in order

9. participants aren't informed about details of study
11. ____ characteristics
13. variable that is manipulated
14. type of question that creates quantitative date
18. experiment that takes place in a controlled setting
19. hypothesis that states that there is no relationship between variables
21. average value of numerical data
