# science

## Across

- 4. provides indirect evidence of life
- 6. history of life as documented by fossils
- 7. organism dies and cavity fills with minerals
- 8. organism dies and there is no filling of the cavity
- 9. freezing materials get trapped
- 10. a fossil that is useful for dating and correlating the strata in which it is found

## Down

- 1. results in organic material converting into stone
- 2. reaction occurs when elements switch places in compounds
- 3. all plants and animals matter decays except carbon
- 5. organism is trapped and preserved
