

Name: _____

Date: _____

science project

Across

7. the outermost layer of the earth
9. when earthquakes occur they produce these
11. most recent supercontinent
13. earth's middle layer
14. energy transfer through space
17. flow that transfers heat within a fluid

19. results from a force pressing on an area

20. the middle of earth

Down

1. theory that the continents moved slowly over time
2. the uppermost layer of the mantle
3. undersea mountain range
4. soft layer of the mantle
5. heat transfer by the movement of fluids

6. a trace of an ancient organism

8. oceanic crust is made mostly of this

10. layer that surrounds the inner core

12. continental crust is made mostly of this

15. device used to map the ocean

16. measure of mass and volume in an object

18. heat transfer between two objects that are touching
