

Name: _____

Date: _____

science terms

Across

5. transfer of energy by electromagnetic waves
6. a release of static discharge
7. potential energy and kinetic energy that is more associated with motion is called?
8. the transfer of energy as heat through the movement of a gas or liquid.
9. energy transferred at a higher temperature is called ?

10. mechanical energy stored is called

Down

1. a material that is poor at conducting
2. transfer of energy as heat from one substance to another through direct contact.
3. a material that transfers heat very well
4. total amount of kinetic energy of all particles in a substance
