- |                       |                   |                   |                  |                 |
|-----------------------|-------------------|-------------------|------------------|-----------------|
| energy transformation | unbalanced forces | electrical energy | potential energy | balanced forces |
| energy transfer       | chemical energy   | thermal energy    | scientific law   | nuclear energy  |
| kinetic energy        | elastic energy    | disadvantage      | deceleration     | acceleration    |
| temperature           | observation       | efficiency        | variables        | net force       |
| advantage             | trade-off         | insulator         | conductor        | constant        |
| evidence              | distance          | friction          | control          | inertia         |
| newton                | energy            | weight            | speed            | force           |
| sound                 | light             | rate              | mass             | heat            |
| drag                  |                   |                   |                  |                 |
