

unit 3 measurement and statistics

Across

- 6. graph of vertical bars representing frequency
- 7. the center number of the list of numbers
- 12. facts and statistics used for reference
- 14. measurement consisting of seven base units
- 16. amount of levels change or slight differences in condition

Down

- 1. degree to which repeated measurements
- 2. distance of value in a populations
- 3. graph in the coordinate plane
- 4. digits in decimal number, carry meaning
- 5. function representing the distance of variables
- 8. collection of methods

- 9. measuring instrument, two measurable laws
- 10. degree of closeness
- 11. adding the values, then dividing by the number
- 13. determine the size, amount, degree of an object by comparison with standard units
- 15. standard quantity in terms of quantities expressed
