

volcanoes

Across

- 2. a vent in the earth's crust through which lava, steam, and ash come
- 6. red hot liquid that explodes out of volcanoes
- 8. collision of earth's crustal plates results in one plate being drawn down or overridden by another
- 9. area that may erupt
- 10. the property of a fluid that resists the force tending to cause the fluid to flow

Down

- 1. the volcanic rock ejected during an eruption
- 3. any body of igneous rock that solidified far below the earth's surface
- 4. cup shaped cavity on the surface of the earth
- 5. large cavity resulting from the explosion or collapse of the center of a volcano
- 7. an opening at the earth's surface from which volcanic material as lava, steam, or gas is emitted
