

# weather vocabulary

**Across**

- 3. instrument that measures wind speed
- 7. a large body of air that has properties similar th the part of earths surface over which it develops
- 8. Type of cloud that is puffy and white, often having flat base; associated with fair weather
- 10. what is a state of the atmosphere at a specific time and place
- 11. a violently rotating column of air in contact with the ground

- 12. type of cloud that usually forms at how altitudes; associated with fair weather, rain, or snow
- 13. movement of air from high pressure to areas of low pressure
- 14. large, swirling, low pressure system that forms over the warm atlantic ocean
- 15. Measure of the amount of water vapor present in the air compared to the amount needed fro saturation at a specific temperature

**Down**

- 1. precipitation that forms when rain drops pass through a layer of freezing air near earths surface, forming ice pellets
- 2. Formation of liquid water from water vapor
- 4. precipitation in the form of lumps; formed when water freezes in layers around a small nucleus
- 5. measure of the average amount of motion of molecules
- 6. Amount of water vapor in the air
- 9. temperature at which air is saturated and condensation forms
